6. Further information

### 1. WHAT ENTEROGERMINA IS AND WHAT IT IS USED FOR

Enterogermina is a medicine consisting of a spore suspension of *Bacillus clausii* (normal flora) with no pathogenicity (without pathogenic ability).

Enterogermina is used for:

- the prevention and treatment of the alteration of the normal balance of intestinal flora (dysbiosis) in the body resulting from the imbalance of intestinal flora (endogenous avitaminosis);
- coadjutant treatment to restore intestinal microbial flora altered during treatment with antibiotics;
- the treatment of acute and chronic gastro-intestinal diseases of infants caused by poisoning of intestinal flora (intestinal dysmicrobism) or vitamin deficiencies in the organism (avitaminosis).

### Health education notes

The intestinal bacterial flora constitutes a real defensive barrier against harmful bacteria. It is weakened by infections, poisoning, food disorders, changes in diet or use of antibiotics. This imbalance may lead to pain and an increase in air in the intestine.

Talk to your doctor if you do not notice any improvements or if you notice a worsening of symptoms.

### 2. WHAT YOU NEED TO KNOW BEFORE YOU TAKE ENTEROGERMINA

#### Contra-indications :

#### Do not take Enterogermina

- if you are allergic to spores of polyantibiotic-resistant *Bacillus clausii* or any of the other ingredients listed in section 6).

#### Appropriate precautions for use ; Special warnings :

#### Warnings and precautions

Talk to your doctor or pharmacist before taking Enterogermina.

This medication is for oral use only. Do not inject or administer through other routes. Improper use may lead to severe anaphylactic reactions such as anaphylactic shock.

During treatment with antibiotics, ingest Enterogermina between one administration and the other.

If you notice the presence of corpuscles, or of tiny particles in the Enterogermina vials, that does not mean the product is impaired, as these are simply clusters of *Bacillus clausii* spores.

#### Other medicines and Enterogermina

Inform your doctor or your pharmacist if you are taking, have recently taken or could take any other medicine.

No disorders (interactions) are envisaged concerning the association between Enterogermina and other medicines.
